

ACHIEVEMENT

*Evolution of the
Olympic Games
Conference Dates:
June 20 to 27*

The Acropolis Museum of Hellenic History will host its annual interdisciplinary conference this year on the topic of the Olympians—the evolution of the games as reconstructed by archaeologists, geologists, classicists, and other experts on Hellenic history.

The keynote speaker will be Dr. Gerta Gomez, renowned medical archaeologist, who will present her findings on “Sports Medicine in the 6th Century B.C.” We hope that all members and friends of the museum will join us for a fascinating week of inquiry into this intriguing facet of classical civilization.

Apple LaserWriter Select 360

This high-performance laser printer can be shared by workgroups via EtherTalk and LocalTalk networks. This sample was printed

at 600 dots per inch on 70-pound Simpson EverGreen Vellum Spruce Text paper, using Apple's LaserWriter Select Toner Cartridge.
