

# BACTRACK® SingleShot™

## DISPOSABLE BREATH ALCOHOL TEST

CHANGE IN COLOR INDICATES  
BLOOD ALCOHOL CONTENT

The BACtrack® SingleShot™ is a single-use disposable breath alcohol tester that is over 99% accurate and provides rapid results.

### KEY FEATURES

- The SingleShot is less than three inches long and a quarter inch thick so it can literally be carried in any purse or pocket. Squeeze the center of the tube to activate the test, and blow through the SingleShot. Based on your Blood Alcohol Content (BAC), the crystals will either stay yellow, indicating a negative result, or change to blue/green, indicating a positive result.
- The BACtrack SingleShot is available at 0.02, 0.05, and 0.08 %BAC thresholds. The 0.02 test is perfect for zero-tolerance environments like schools, businesses, and for family use. The higher 0.05 and 0.08 thresholds can help indicate increased levels of intoxication help prevent alcohol-related accidents.
- The SingleShot does not require batteries, maintenance, recalibration or training. Each package contains two SingleShot tubes.

■ Positive Result = Green/Blue  
■ Negative Result = Yellow
