Does Your Restaurant Need A PCI Security Compliance Check-Up?

BRILLIANTechnologies LLC

innovations for your restaurant

PCI COMPLIANCE

Is your restaurant at risk? Over 30% of all merchants do not know that PCI compliance is mandatory today. Your equipment and processes must be validated to meet Payment Card Industry (PCI) data security requirements or you face monthly non-compliance fees and may be subject to significant fines.

Research
• Are your terminals up to date?
• Do your processes protect sensitive cardholder data?

Comply
• We'll perform a security assessment of your business.
• We'll help complete the required questionnaire and quarterly network scan.

Certify
• Verify your customer data is secure.
• Validate compliance and receive your certificate.
