Start Screen - Screen where clients log in to the NARUS System. When a user successfully logs in, the cookie is planted on their computer so the next time they return their user name is already entered and a list of their favorite reports is available for convient quick access. Potential customers reviewing the service would receive different value added information in the same newsletter like format.

Messages for customers and/or potential customers.

This week in NARUS News...
New Demo is up for our newest service named XYZ
at http://www.narus.com.

CUSTOMER TIP- To get to your favorite reports quickly use the pop-up menu after you've entered you password.

NARUS WINS AGAIN
Lorem ipsum dolor sit amet, consectetuer adipiscing elit, sed diam nonummy nibh euismod tincidunt ut laoreet dolore magna aliquam erat.

Factoids...

POP3 - Stands for P something, O something, P something with the letter 3 allways at the end.

Lobortis nisl ut aliquip ex ea commodo consequat. Duis autem vel eum iriure dolor in hendrerit in vulputate velit esse molestie consequat, vel illum dolore eu feugiat nulla facilisis

eum iriure dolor in hendrerit in vulputate velit esse molestie consequat, vel illum dolore eu feugiat nulla facilisis at vero eros et accumsan et iusto odio dignissim qui blandit praesent

Product Screen 1 - In this version selecting one option in frame 1 dynamically updates available options in frames 2 and 3. Having all available report options layed out allows people to remember click patterns they use to create reports. The Generate Report button would spawn a second browser window with chart and data.

DATA TABLE

Product Screen 5 - This shows the Help screen with all the help topics listed as an index.
When a Help Topic Name is clicked on the frame to the right displays the text and/or screens shots describing the topic.
This might work with context sensitive help from product screens where a small "?" appears on the screen or frame.
