The 26th century. The Earth has been reclaimed by the forces of nature gone berserk. Amid the shattered remnants of civilization, adventurer-mechanic Jack Tenrec and scientist Hannah Dundee battle to maintain the precarious balance of life in a world of prehistoric dangers. A world of mysterious technology and savage beauty. A world of CADILLACS AND DINOSAURS!

ROGUE When a rogue Tyrannosaurus Rex attacks settlements near the City in the Sea, Old Blood Mechanic Jack Tenrec discovers a plot to turn the populace against the usually gentle dinosaurs. With the help of Wassoon scientist Hannah Dundee, Jack battles heavily armed dino-poachers to solve the mystery of the rampaging Rex - and keep the Earth's vital "machinery of life" in balance!

DINO DRIVE Jack and Hannah have their hands full after a stampeding herd of gigantic triceratops threatens to flatten a nearby village. Racing to save the animals from the sinister Governor Scharnhorst and her dinosaur-poaching pals, Jack and his crew mount a Cadillac-powered "cattle" drive in a perilous quest to herd the endangered animals to safer pastures.
